FELIX VERNIN

ENGINEERING STUDENT — AI, DATA & CYBERSECURITY

+33 6 44 06 29 43 | felix.vernin@edu.esiee.fr | Nice, 06000, France

PROFILE

Engineering student at ESIEE Paris, currently pursuing a Master of Science specializing in artificial intelligence and cybersecurity. Interested in machine learning, data analysis, software development and network security.

EDUCATION

2023–2026 — Master of Science, ESIEE Paris, Paris. Studies in artificial intelligence and cybersecurity, including machine learning, data analysis, network security and ethical hacking.

2021–2023 — PCSI–PSI Preparatory Classes, Centre International de Valbonne, Sophia Antipolis. Two years of intensive study in physics, mathematics and engineering sciences.

2021 — French Baccalauréat, Lycée Albert Calmette, Nice. Specializations in mathematics and physics, with advanced English studies.

EXPERIENCE

April–September 2026 — Artificial Intelligence Intern, Instituto de Astrofísica de Canarias (IAC). Developed multi-horizon probabilistic models to forecast precipitable water vapor, including data preparation, modeling and uncertainty analysis.

June–August 2025 — Artificial Intelligence Intern, Orange. Artificial intelligence internship. The available source version does not specify the detailed responsibilities.

January 2022–May 2023 — TIPE Project, Centre International de Valbonne, Valbonne. Studied atmospheric pollution using astronomical observation techniques at the Observatoire de la Côte d’Azur to assess its impact on air clarity and night-sky visibility.

July 2023–August 2024 — Bar and Restaurant Server, Akathor, Nice. Provided customer service in a busy student bar.

PROJECTS

June 2024 — ESIEE Project. Designed a watch with a gyroscopic sensor capable of recognizing its wearer among seven people using machine learning.

SKILLS

Programming: Python, Java, C/C++. Development: web and Android development. Data and AI: machine learning, data analysis. Cybersecurity: network security and ethical hacking.

LANGUAGES

French: native. English: B2 level (EF Education First).

INTERESTS

Programming and personal projects: developing software projects to strengthen technical skills. Sports: activities that support teamwork, discipline and stress management.
